Subject index

A

Abutment designs for tooth-supported dentures, load transfer to alveolar bone as influenced by (Warren and Caputo), 137

Acrylic resin articulator mounting platform, construction of (Sales), 221
denture bases, silane bonding of porcelain denture teeth to (Moffa et al.), 620
teeth, immediate implantation of, into human tooth sockets (Ehrlich and Azaz), 205

Adjustment of new-concept articulator, Part II. New semiadjustable articulator (Tanaka et al.), 158

Aids, teaching, simple technique for making Diazochrome slides as (Tanaka), 345

Airborne beryllium concentrations in dental spaces, factors affecting (Hinman et al.), 210

Alloy(s), four new commercial partial denture, physical properties and microstructure of (Morris and Asgar), 36
gold, and dental amalgam, tissue reactions to implants composed of (Nagem-Filho et al.), 542

Alveolar bone, load transfer to, as influenced by abutment designs for tooth-supported dentures (Warren and Caputo), 137

Amalgam, dental, gold alloy and, tissue reactions to implants composed of (Nagem-Filho et al.), 542
restorations, individualized matrix bands for (Birtcil and Starr), 547

Anchor attachments used as locking devices in two-part removable prostheses (Walter), 628

Anterior and posterior restorative materials, clinical evaluation of composite resins as (Leinfelder et al.), 407
teeth, natural, complete denture technique using (Kafandaris and Theodorou), 571

Anteroposterior position of Myo-Monitor centric (Noble), 398

Apex of Gothic arch tracing, location of terminal hinge axis and, comparison of empirical centric relation records with (Smith), 511

Appliances, dental, methods to preclude aspiration or swallowing of (Zakaria), 575

Arch tracing, Gothic, apex of, location of terminal hinge axis and, comparison of empirical centric relation records with (Smith), 511

Articulator mounting platform, acrylic resin, construction of (Sales), 221
new semiadjustable. Part I. Concept behind new articulator (Tanaka and Beu), 10
Part II. Adjustment of new-concept articulator (Tanaka et al.), 158

Artificial teeth, measuring rate of wear of, in complete dentures (Harrison and Huggett), 615
transition from natural to (Plainfield), 489

Aspiration or swallowing of dental appliances, methods to preclude (Zakaria), 575

Attachments, anchor, used as locking devices in two-part removable prostheses (Walter), 628

Axis, terminal hinge, and apex of Gothic arch tracing, comparison of empirical centric relation records with location of (Smith), 511

B

Bands, individualized matrix, for amalgam restorations (Birtcil and Starr), 547

Base(s), acrylic resin denture, silane bonding of porcelain denture teeth to (Moffa et al.), 620
denture, characterizing, for non-Caucasian patients (Choudhary et al.), 73
temporary, for complete dentures, technique for making (Assadzadeh and Yarmand), 333

Beam, radiation, modified intraoral prosthesis for directing (Parel and Drane), 666

January, pp. 1-118; February, pp. 119-238; March, pp. 239-360; April, pp. 361-478; May, pp. 479-598; June, pp. 599-720.

Beryllium concentrations, airborne, in dental spaces, factors affecting (Hinman et al.), 210
Biologic parameters for denture design, studies of. Part I. Comparison of masseter muscle activity during chewing of crisp and soggy wafers in denture and dentition groups (Kapur), 242
Blade implant, single, and surrounding bone, clinical and histologic evaluation of (Smithloff et al.), 427
Blocks of resin teeth, occlusion rims with (Klein), 17
Bonding, silane, of porcelain denture teeth to acrylic resin denture bases (Moffa et al.), 620
Bone, alveolar, load transfer to, as influenced by abutment designs for tooth-supported dentures (Warren and Caputo), 137
changes observed in serial radiographs, Part I. Effects of variations in opposing dentition on changes in partially edentulous mandible (Plotnick et al.), 278
metabolism, effect of thyrocalcitonin and growth hormones on (Klein), 365
resorption in edentulous patients, systemic and prosthodontic treatment to prevent (Page), 483
surrounding, clinical and histologic evaluation of single blade implant and (Smithloff et al.), 427
Book review(s), 233, 353, 469
Boucher, Carl O., 1904–1975 (Block), 361
Boxing impressions (Bolouri et al.), 692

C

Candida, prevention of growth of, on Silastic 390 soft liner for dentures (Masella et al.), 250
Cast restorations, impression technique for (Culbreath), 417
Casting technique, modified hygroscopic gold (Cecconi and Asgar), 216
Cement durability, dental, clinical evaluation of (Richter and Ueno), 294
Centric, Myo-Monitor, anteroposterior position of (Noble), 398
relation, functional significance of, as demonstrated by electromyography of lateral pterygoid muscles (Owens et al.), 5
records, empirical, comparison of, with location of terminal hinge axis and apex of Gothic arch tracing (Smith), 511
Ceramic-metal restorations, contouring and staining, in mouth (Richardson and Gardner), 637
restoration bonded by etched enamel and resin for fractured incisors (Rochette), 287
Changes in partially edentulous mandible, effects of variations in opposing dentition on. Part I. Bone changes observed in serial radiographs (Plotnick et al.), 278
Changes—Cont'd
Part II. Densitometric measurements (Plotnick et al.), 403
Part III. Tooth mobility and chewing efficiency with various maxillary dentitions (Plotnick et al.), 529
Characteristics, surface, of dental stone: impression orientation (Young), 336
Characterizing denture base for non-Caucasian patients (Choudhary et al.), 73
Chewing of crisp and soggy wafers, comparison of masseter muscle activity during, in denture and dentition groups, Part I. Studies of biologic parameters for denture design (Kapur), 242
efficiency, tooth mobility and, with various maxillary dentitions, Part III. Effects of variations in opposing dentition on changes in partially edentulous mandible (Plotnick et al.), 529
Cleaner, electrosonic denture, evaluation of (Muenchinger), 610
Cleft(s) of lip and palate, heritability of (Bixler), 100
palate patient, prosthodontic management of (Desjardins), 655
Clinical evaluation of composite resins as anterior and posterior restorative materials (Leinfelder et al.), 407
dental cement durability (Richter and Ueno), 294
occlusal interrelationships, development of simplified system for. Part I. Acquisition of information (Rieder), 264
Part II. Storage of information (Rieder), 433
and histologic evaluation of single blade implant and surrounding bone (Smithloff et al.), 427
Commercial partial denture alloys, four new, physical properties and microstructure of (Morris and Asgar), 36
Complete denture(s), measuring rate of wear of artificial teeth in (Harrison and Huggett), 615
prosthodontics, preclinical, analysis of experimental approach to teaching (Lang), 521
significance of fovea palatini in (Lye), 504
splint, final impressions, and replica dentures: zipper technique for duplicating dentures (Singer), 582
technique using natural anterior teeth (Kafandaris and Theodorou), 571
temporary bases for, technique for making (Assadzadeh and Yarmand), 333
wearers, factors affecting masticatory performance of (Kelly), 122
Composite resin(s), clinical evaluation of, as anterior and posterior restorative materials (Leinfelder et al.), 407
dowel and core (Stahl and O'Neal), 342

Computerized analysis and duplication of mandibular motion (Knap et al.), 535
Concept behind new articulator, Part I. New semiadjustable articulator (Tanaka and Beu), 10
of occlusion, form and function, and maxillomandibular relationship (Levy), 149
Condylar controls, molded, reproducibility of, with intraoral registration method. Part II. Human jaw movement (Solberg and Clark), 60
Contouring and staining ceramic-metal restorations in mouth (Richardson and Gardner), 637
Controls, molded condylar, reproducibility of, with intraoral registration method. Part II. Human jaw movement (Solberg and Clark), 60
Copperplating rubber base impressions, laboratory procedure for (Cummins), 342
Core, composite resin dowel and (Stahl and O'Neal), 642
course in occlusion, teaching (Weisgold), 89
Course(s), core, in occlusion, teaching (Weisgold), 89
postgraduate and refresher, 109, 470
Cracks, enamel, scanning electron microscopy of, after etching: in vitro study (Liatukas and Young), 558
Currents, electrosurgical, histologic and electronic evaluation of: nonfiltered full-wave modulated vs. filtered current (Sozio et al.), 300

D

Deflection, stress and, of three different pontic designs (Hood et al.), 54
Densitometric measurements, Part II. Effects of variations in opposing dentition on changes in partially edentulous mandible (Plotnick et al.), 403
Dental amalgam, gold alloy and, tissue reactions to implants composed of (Nagem-Filho et al.), 542
appliances, methods to preclude aspiration or swallowing of (Zakaria), 575
cement durability, clinical evaluation of (Richter and Ueno), 294
materials, four, plaque-retaining capacity of (Wise and Dykema), 178
program, nursing-home, development of (Lukens et al.), 22
spaces, factors affecting airborne beryllium concentrations in (Hinman et al.), 210
stone, surface characteristics of: impression orientation (Young), 336
Dentition groups, denture and, comparison of masseter muscle activity during chewing of crisp and soggy wafers in, Part I. Studies of biologic parameters for denture design (Kapur), 242
Dentition—Cont'd
opposing, effects of variations in, on changes in partially edentulous mandible. Part I. Bone changes observed in serial radiographs (Plotnick et al.), 278
Part II. Densitometric measurements (Plotnick et al.), 403
Part III. Tooth mobility and chewing efficiency with various maxillary dentitions (Plotnick et al.), 529
Dentulous and edentulous subjects, comparative study of occlusal plane in (L'Estrange and Vig), 495
Denture(s) alloys, four new commercial partial, physical properties and microstructure of (Morris and Asgar), 36
base, characterizing, for non-Caucasian patients (Choudhary et al.), 73
cleaner, electrosonic, evaluation of (Muenchinger), 610
complete, measuring rate of wear of artificial teeth in (Harrison and Huggett), 615
technique for making temporary bases for (Assadzadeh and Yarmand), 333
design, biologic parameters for, studies of. Part I. Comparison of masseter muscle activity during chewing of crisp and soggy wafers in denture and dentition groups (Kapur), 242
patients, occlusal force discrimination by (Pacer and Bowman), 602
prevention of growth of Candida on Silastic 390 soft liner for (Masella et al.), 250
processing, method of reducing shifting of teeth in (Vig), 80
prosthodontics, complete, significance of fovea palatini in (Lye), 504
preclinical complete, analysis of experimental approach to teaching (Lang), 521
removable partial, advantages of mesial rests for (Zach), 32
facings in (Askinas), 633
surface identification, use of in vitro test method as applied to (Johns et al.), 454
technique, complete, using natural anterior teeth (Kafandaris and Theodorou), 571
teeth, porcelain, silane bonding of, to acrylic resin denture bases (Moffa et al.), 620
tooth-supported, abutment designs for, load transfer to alveolar bone as influenced by (Warren and Caputo), 137
wearers, complete, factors affecting masticatory performance of (Kelly), 122
zipper technique for duplicating: final impressions, replica dentures, and complete denture splint (Singer), 582

Design(s), abutment, for tooth-supported dentures, load transfer to alveolar bone as influenced by (Warren and Caputo), 137
denture, biologic parameters for, studies of. Part I. Comparison of masseter muscle activity during chewing of crisp and soggy wafers in denture and dentition groups (Kapur), 242
three different pontic, stress and deflection of (Hood et al.), 54
Device(s), locking, anchor attachments used as, in two-part removable prostheses (Walter), 628
for restraint of Dilantin hypertrophy (Levene and Lubatta), 313
Diagnostic wax-up technique (Morgan et al.), 169
Dialogue—treatment modality (Nassif et al.), 696
Diazochrome slides as teaching aids, simple technique for making (Tanaka), 345
Diginglymus joint—temporomandibular joint (Hilloowala), 328
Dilantin hypertrophy, device for restraint of (Levene and Lubatta), 313
Directory, 114, 234, 355, 474, 595, 701
Disc of temporomandibular joint, function of (Gillbe), 196
Dowel and core, composite resin (Stahl and O'Neal), 642
Duplicating dentures, zipper technique for: final impressions, replica dentures, and complete denture splint (Singer), 582
Duplication of mandibular motion, computerized analysis and (Knap et al.), 535
Dysfunction subjects, TMJ, pantographic records on, treated with occlusal splints: progress report (Roura and Clayton), 442
temporomandibular joint, influence of occlusal splints on jaw position and musculature in patients with (Kovaleski and De Boever), 321

E

Edentulous mandible, partially, effects of variations in opposing dentition on changes in. Part I. Bone changes observed in serial radiographs (Plotnick et al.), 278
Part II. Densitometric measurements (Plotnick et al.), 403
Part III. Tooth mobility and chewing efficiency with various maxillary dentitions (Plotnick et al.), 529
patients, systemic and prosthodontic treatment to prevent bone resorption in (Page), 483
subjects, dentulous and, comparative study of occlusal plane in (L'Estrange and Vig), 495
Elastomeric impression materials, highly filled, accuracy of (Reisbick and Matyas), 67
Electromyography of lateral pterygoid muscles, functional significance of centric relation as demonstrated by (Owens et al.), 5
Electron microscopy, scanning, of enamel cracks after etching: in vitro study (Liatukas and Young), 558
Electronic evaluation, histologic and, of electrosurgical currents: nonfiltered full-wave modulated vs. filtered current (Sozio et al.), 300
Electrosonic denture cleaner, evaluation of (Muenchinger), 610
Electrosurgery for impression making, gingival recession with (Coelho et al.), 422
Electrosurgical currents, histologic and electronic evaluation of: nonfiltered full-wave modulated vs. filtered current (Sozio et al.), 300
Enamel cracks, scanning electron microscopy of, after etching: in vitro study (Liatukas and Young), 558
and resin, etched, ceramic restoration bonded by, for fractured incisors (Rochette), 287
Etched enamel and resin, ceramic restoration bonded by, for fractured incisors (Rochette), 287
Etching, scanning electron microscopy of enamel cracks after: in vitro study (Liatukas and Young), 558
Experimental approach to teaching preclinical complete denture prosthodontics, analysis of (Lang), 521

F

Facial molds, metallic, direct wax method for fabrication of (Zini et al.), 85
Facings in removable partial dentures (Askinas), 633
Federation of Prosthodontic Organizations: Annual Session Report, 1974 (Brewer), 458
Filtered current, nonfiltered full-wave modulated vs.: histologic and electronic evaluation of electrosurgical currents (Sozio et al.), 300
Force discrimination, occlusal, by denture patients (Pacer and Bowman), 602
distribution, masticatory, shape of implants in (Shpiro and Binderman), 567
Form and function concept of occlusion and maxillomandibular relationship (Levy), 149
Fovea palatini, significance of, in complete denture prosthodontics (Lye), 504
Fractured incisors, ceramic restoration bonded by etched enamel and resin for (Rochette), 287
Full-wave modulated, nonfiltered, vs. filtered current: histologic and electronic evaluation of electrosurgical currents (Sozio et al.), 300
Function concept of occlusion, form and, and maxillomandibular relationship (Levy), 149
of disc of temporomandibular joint (Gillbe), 196

Function—Cont'd
temporomandibular joint, radiographic investigations into (Weinberg), 672
Functional significance of centric relation as demonstrated by electromyography of lateral pterygoid muscles (Owens et al.), 5

G

Gingival recession with electrosurgery for impression making (Coelho et al.), 422
Gold alloy and dental amalgam, tissue reactions to implants composed of (Nagem-Filho et al.), 542
casting technique, modified hygroscopic (Cecconi and Asgar), 216
Gothic arch tracing, apex of, location of terminal hinge axis and, comparison of empirical centric relation records with (Smith), 511
Growth hormones, thyrocalcitonin and, effect of, on bone metabolism (Klein), 365
Gunning splint, improved (Goss and Brown), 562

H

Heritability of clefts of lip and palate (Bixler), 100
Hinge axis, terminal, and apex of Gothic arch tracing, comparison of empirical centric relation records with location of (Smith), 511
Histologic and electronic evaluation of electrosurgical currents: nonfiltered full-wave modulated vs. filtered current (Sozio et al.), 300
evaluation, clinical and, of single blade implant and surrounding bone (Smithloff et al.), 427
Hormones, growth, thyrocalcitonin and, effect of, on bone metabolism (Klein), 365
Hot-pressed porcelain process for porcelain-fused-to-metal restorations (McPhee), 577
Human jaw movement, Part II. Reproducibility of molded condylar controls with intraoral registration method (Solberg and Clark), 60
tooth sockets, immediate implantation of acrylic resin teeth into (Ehrlich and Azaz), 205
Hygroscopic gold casting technique, modified (Cecconi and Asgar), 216
Hyperplasia, inflammatory papillary, morphogenesis of (Cutright), 380
Hypertrophy, Dilantin, device for restraint of (Levene and Lubatta), 313

I

Identification, denture surface, use of in vitro test method as applied to (Johns et al.), 454
Implant(s) composed of gold alloy and dental amalgam, tissue reactions to (Nagem-Filho et al.), 542
Implant(s)—Cont'd
shape of, in masticatory force distribution (Shpiro and Binderman), 567
single blade, and surrounding bone, clinical and histologic evaluation of (Smithloff et al.), 427
Implantation, immediate, of acrylic resin teeth into human tooth sockets (Ehrlich and Azaz), 205
Impression(s), boxing (Bolouri et al.), 692
final, replica dentures, and complete denture splint: zipper technique for duplicating dentures (Singer), 582
making, gingival recession with electrosurgery for (Coelho et al.), 422
materials, highly filled elastomeric, accuracy of (Reisbick and Matyas), 67
orientation: surface characteristics of dental stone (Young), 336
rubber base, laboratory procedure for copper-plating (Cummins), 342
technique for cast restorations (Culbreath), 417
Incisors, fractured, ceramic restoration bonded by etched enamel and resin for (Rochette), 287
Inflammatory papillary hyperplasia, morphogenesis of (Cutright), 380
Information, acquisition of, Part I. Development of simplified system for clinical evaluation of occlusal interrelationships (Rieder), 264
storage of, Part II. Development of simplified system for clinical evaluation of occlusal interrelationships (Rieder), 433
Inlay and onlay preparations, photoelastic analysis of (Fisher et al.), 47
Interocclusal records, silicone-body, differential accuracy of, and associated weight loss due to volatiles (Millstein et al.), 649
Interrelationships, occlusal, development of simplified system for clinical evaluation of. Part I. Acquisition of information (Rieder), 264
Part II. Storage of information (Rieder), 433
Intraoral prosthesis, modified, for directing radiation beam (Parel and Drane), 666
registration method, reproducibility of molded condylar controls with. Part II. Human jaw movement (Solberg and Clark), 60
In vitro study: scanning electron microscopy of enamel cracks after etching (Liatukas and Young), 558
test method, use of, as applied to denture surface identification (Johns et al.), 454

J

Jaw movement, human, Part II. Reproducibility of molded condylar controls with intraoral registration method (Solberg and Clark), 60

Jaw—Cont'd
position and musculature in patients with temporomandibular joint dysfunction, influence of occlusal splints on (Kovaleski and De Boever), 321
Joint dysfunction, temporomandibular, influence of occlusal splints on jaw position and musculature in patients with (Kovaleski and De Boever), 321
function, temporomandibular, radiographic investigations into (Weinberg), 672
temporomandibular—diginglymus joint (Hilloowala), 328
disc of, function of (Gillbe), 196

L

Laboratory procedure for copperplating rubber base impressions (Cummins), 342
Lateral pterygoid muscles, electromyography of, functional significance of centric relation as demonstrated by (Owens et al.), 5
Leakage around various types of retention pins (Chan and Svare), 191
Liner, Silastic 390 soft, for dentures, prevention of growth of Candida on (Masella et al.), 250
Lip and palate, clefts of, heritability of (Bixler), 100
Load transfer to alveolar bone as influenced by abutment designs for tooth-supported dentures (Warren and Caputo), 137
Locking devices, anchor attachments used as, in two-part removable prostheses (Walter), 628

M

Mandible, partially edentulous, effects of variations in opposing dentition on changes in. Part I. Bone changes observed in serial radiographs (Plotnick et al.), 278
Part II. Densitometric measurements (Plotnick et al.), 403
Part III. Tooth mobility and chewing efficiency with various maxillary dentitions (Plotnick et al.), 529
Mandibular motion, computerized analysis and duplication of (Knap et al.), 535
Masseter muscle activity, comparison of, during chewing of crisp and soggy wafers in denture and dentition groups, Part I. Studies of biologic parameters for denture design (Kapur), 242
Masticatory force distribution, shape of implants in (Shpiro and Binderman), 567
performance of complete denture wearers, factors affecting (Kelly), 122
Materials, anterior and posterior restorative, clinical evaluation of composite resins as (Leinfelder et al.), 407
four dental, plaque-retaining capacity of (Wise and Dykema), 178
highly filled elastomeric impression, accuracy of (Reisbick and Matyas), 67
Matrix bands, individualized, for amalgam restorations (Birtcil and Starr), 547
Maxillary dentitions, various, tooth mobility and chewing efficiency with, Part III. Effects of variations in opposing dentition on changes in partially edentulous mandible (Plotnick et al.), 529
Maxillomandibular relationship, form and function concept of occlusion and (Levy), 149
Measurements, densitometric, Part II. Effects of variations in opposing dentition on changes in partially edentulous mandible (Plotnick et al.), 403
Measuring rate of wear of artificial teeth in complete dentures (Harrison and Huggett), 615
Mesial rests, advantages of, for removable partial dentures (Zach), 32
Metabolism, bone, effect of thyrocalcitonin and growth hormones on (Klein), 365
Metal-ceramic restorations, contouring and staining, in mouth (Richardson and Gardner), 637
restorations, porcelain-fused-to-, hot-pressed porcelain process for (McPhee), 577
Metallic facial molds, direct wax method for fabrication of (Zini et al.), 85
Method(s), direct wax, for fabrication of metallic facial molds (Zini et al.), 85
intraoral registration, reproducibility of molded condylar controls with. Part II. Human jaw movement (Solberg and Clark), 60
in vitro test, use of, as applied to denture surface identification (Johns et al.), 454
to preclude aspiration or swallowing of dental appliances (Zakaria), 575
of reducing shifting of teeth in denture processing (Vig), 80
Microscopy, scanning electron, of enamel cracks after etching: in vitro study (Liatukas and Young), 558
Microstructure, physical properties and, of four new commercial partial denture alloys (Morris and Asgar), 36
Mobility, tooth, and chewing efficiency with various maxillary dentitions, Part III. Effects of variations in opposing dentition on changes in partially edentulous mandible (Plotnick et al.), 529
Modulated, nonfiltered full-wave, vs. filtered current: histologic and electronic evaluation of electrosurgical currents (Sozio et al.), 300
Mold, metallic facial, direct wax method for fabrication of (Zini et al.), 85
Molded condylar controls, reproducibility of, with intraoral registration method. Part II. Human jaw movement (Solberg and Clark), 60
Morphogenesis of inflammatory papillary hyperplasia (Cutright), 380

Motion, mandibular, computerized analysis and duplication of (Knap et al.), 535
Mounting platform, acrylic resin articulator, construction of (Sales), 221
Muscle(s) activity, masseter, comparison of, during chewing of crisp and soggy wafers in denture and dentition groups, Part I. Studies of biologic parameters for denture design (Kapur), 242
lateral pterygoid, electromyography of, functional significance of centric relation as demonstrated by (Owens et al.), 5
Musculature, jaw position and, in patients with temporomandibular joint dysfunction, influence of occlusal splints on (Kovaleski and De Boever), 321
Myo-Monitor centric, anteroposterior position of (Noble), 398

N

Nasal stents, dynamic orificial resin adjustable (Doran), 315
Natural anterior teeth, complete denture technique using (Kafandaris and Theodorou), 571
to artificial teeth, transition from (Plainfield), 489
News and notes, 116, 236, 357, 476, 597, 719
Non-Caucasian patients, characterizing denture base for (Choudhary et al.), 73
Nonfiltered full-wave modulated vs. filtered current: histologic and electronic evaluation of electrosurgical currents (Sozio et al.), 300
Nursing-home dental program, development of (Lukens et al.), 22

O

Obturator, superiorly based (Tautin and Schaaf), 96
Occlusal force discrimination by denture patients (Pacer and Bowman), 602
interrelationships, development of simplified system for clinical evaluation of. Part I. Acquisition of information (Rieder), 264
Part II. Storage of information (Rieder), 433
plane in dentulous and edentulous subjects, comparative study of (L'Estrange and Vig), 495
splints, influence of, on jaw position and musculature in patients with temporomandibular joint dysfunction (Kovaleski and De Boever), 321
pantographic records on TMJ dysfunction subjects treated with: progress report (Roura and Clayton), 442
Occlusion, form and function concept of, and maxillomandibular relationship (Levy), 149
rims with blocks of resin teeth (Klein), 17
teaching a core course in (Weisgold), 89
Office, prosthetic, planning (Kilpatrick), 27
Onlay preparations, inlay and, photoelastic analysis of (Fisher et al.), 47
Organizations, Federation of Prosthodontic: Annual Session Report, 1974 (Brewer), 458
Orientation, impression: surface characteristics of dental stone (Young), 336
Orificial resin adjustable nasal stents, dynamic (Doran), 315
Overdentures, selectively retained vital roots for partial support of: patient report (Guyer), 258

P

Palate, lip and, clefts of, heritability of (Bixler), 100
patient, cleft-, prosthodontic management of (Desjardins), 655
Palatini, fovea, significance of, in complete denture prosthodontics (Lye), 504
Pantographic records on TMJ dysfunction subjects treated with occlusal splints: progress report (Roura and Clayton), 442
Papillary hyperplasia, inflammatory, morphogenesis of (Cutright), 380
Parameters, biologic, for denture design, studies of. Part I. Comparison of masseter muscle activity during chewing of crisp and soggy wafers in denture and dentition groups (Kapur), 242
Partial denture(s) alloys, four new commercial, physical properties and microstructure of (Morris and Asgar), 36
removable, advantages of mesial rests for (Zach), 32
facings in (Askinas), 633
Periodontal prostheses, processed provisional splint in (Federick), 553
Photoelastic analysis of inlay and onlay preparations (Fisher et al.), 47
Physical properties and microstructure of four new commercial partial denture alloys (Morris and Asgar), 36
Pins, retention, various types of, leakage around (Chan and Svare), 191
Plane, occlusal, comparative study of, in dentulous and edentulous subjects (L'Estrange and Vig), 495
Plaque-retaining capacity of four dental materials (Wise and Dykema), 178
Platform, acrylic resin articulator mounting, construction of (Sales), 221
Pontic designs, three different, stress and deflection of (Hood et al.), 54
Porcelain denture teeth, silane bonding of, to acrylic resin denture bases (Moffa et al.), 620
process, hot-pressed, for porcelain-fused-to-metal restorations (McPhee), 577
Posterior restorative materials, anterior and, clinical evaluation of composite resins as (Leinfelder et al.), 407
Postgraduate and refresher courses, 109, 470
Pour resins, trouble-shooting (Axinn et al.), 689
Preclinical complete denture prosthodontics, analysis of experimental approach to teaching (Lang), 521

Preparations, inlay and onlay, photoelastic analysis of (Fisher et al.), 47
Preprosthetic surgery, role of prosthodontist in (Wilkie), 386
Procedure, laboratory, for copperplating rubber base impressions (Cummins), 342
Process, hot-pressed porcelain, for porcelain-fused-to-metal restorations (McPhee), 577
Processing, denture, method of reducing shifting of teeth in (Vig), 80
Program, nursing-home dental, development of (Lukens et al.), 22
Properties, physical, and microstructure of four new commerical partial denture alloys (Morris and Asgar), 36
Prostheses, periodontal, processed provisional splint in (Federick), 553
two-part removable, anchor attachments used as locking devices in (Walter), 628
Prosthesis, modified intraoral, for directing radiation beam (Parel and Drane), 666
Prosthetic office, planning (Kilpatrick), 27
Prosthodontic(s), complete denture, significance of fovea palatini in (Lye), 504
management of cleft-palate patient (Desjardins), 655
Organizations, Federation of: Annual Session Report, 1974 (Brewer), 458
preclinical complete denture, analysis of experimental approach to teaching (Lang), 521
removable, in United Kingdom and Scandinavia (Levin), 224
treatment, systemic and, to prevent bone resorption in edentulous patients (Page), 483
Prosthodontist, role of, in preprosthetic surgery (Wilkie), 386
Provisional splint, processed, in periodontal prostheses (Federick), 553
Pterygoid muscles, lateral, electromyography of, functional significance of centric relation as demonstrated by (Owens et al.), 5

R

Radiation beam, modified intraoral prosthesis for directing (Parel and Drane), 666
Radiographic investigations into temporomandibular joint function (Weinberg), 672
Radiographs, serial, bone changes observed in, Part I. Effects of variations in opposing dentition on changes in partially edentulous mandible (Plotnick et al.), 278
Reactions, tissue, to implants composed of gold alloy and dental amalgam (Nagem-Filho et al.), 542
Readers' round table, 351, 468, 591
Recession, gingival, with electrosurgery for impression making (Coelho et al.), 422
Records, empirical centric relation, comparison of, with location of terminal hinge axis and apex of Gothic arch tracing (Smith), 511
pantographic, on TMJ dysfunction subjects treated with occlusal splints: progress report (Roura and Clayton), 442
silicone-body interocclusal, differential accuracy of, and associated weight loss due to volatiles (Millstein et al.), 649
Refresher courses, postgraduate and, 109, 470
Registration method, intraoral, reproducibility of molded condylar controls with. Part II. Human jaw movement (Solberg and Clark), 60
Relation, centric, functional significance of, as demonstrated by electromyography of lateral pterygoid muscles (Owens et al.), 5
records, empirical centric, comparison of, with location of terminal hinge axis and apex of Gothic arch tracing (Smith), 511
Relationship, maxillomandibular, form and function concept of occlusion and (Levy), 149
Removable partial dentures, advantages of mesial rests for (Zach), 32
facings in (Askinas), 633
prostheses, two-part, anchor attachments used as locking devices in (Walter), 628
prosthodontics in United Kingdom and Scandinavia (Levin), 224
Replica dentures, final impressions, and complete denture splints: zipper technique for duplicating dentures (Singer) 582
Resin(s) adjustable nasal stents, dynamic orificial (Doran), 315
articulator mounting platform, acrylic, construction of (Sales), 221
composite, clinical evaluation of, as anterior and posterior restorative materials (Leinfelder et al.), 407
denture bases, acrylic, silane bonding of porcelain denture teeth to (Moffa et al.), 620
dowel and core, composite (Stahl and O'Neal), 642
etched enamel and, ceramic restoration bonded by, for fractured incisors (Rochette), 287
pour, trouble-shooting (Axinn et al.), 689
teeth, acrylic, immediate implantation of, into human tooth sockets (Ehrlich and Azaz), 205
blocks of, occlusion rims with (Klein), 17
Resorption, bone, in edentulous patients, systemic and prosthodontic treatment to prevent (Page), 483
Restoration(s), amalgam, individualized matrix bands for (Birtcil and Starr), 547
cast, impression technique for (Culbreath), 417

Restoration(s)—Cont'd
ceramic, bonded by etched enamel and resin for fractured incisors (Rochette), 287
metal, contouring and staining, in mouth (Richardson and Gardner), 637
porcelain-fused-to-metal, hot-pressed porcelain process for (McPhee), 577
Restorative materials, anterior and posterior, clinical evaluation of composite resins as (Leinfelder et al.), 407
Rests, mesial, advantages of, for removable partial dentures (Zach), 32
Retention pins, various types of, leakage around (Chan and Svare), 191
Review(s), book, 233, 353, 469
Rims, occlusion, with blocks of resin teeth (Klein), 17
Roots, selectively retained vital, for partial support of overdentures: patient report (Guyer), 258
Rubber base impressions, laboratory procedure for copperplating (Cummins), 342

S

Scandinavia, United Kingdom and, removable prosthodontics in (Levin), 224
Scanning electron microscopy of enamel cracks after etching: in vitro study (Liatukas and Young), 558
Semiadjustable articulator, new. Part I. Concept behind new articulator (Tanaka and Beu), 10
Part II. Adjustment of new-concept articulator (Tanaka et al.), 158
Serial radiographs, bone changes observed in, Part I. Effects of variations in opposing dentition on changes in partially edentulous mandible (Plotnick et al.), 278
Shape of implants in masticatory force distribution (Shpiro and Binderman), 567
Shifting of teeth, method of reducing, in denture processing (Vig), 80
Silane bonding of porcelain denture teeth to acrylic resin denture bases (Moffa et al.), 620
Silastic 390 soft liner for dentures, prevention of growth of Candida on (Masella et al.), 250
Silicone-body interocclusal records, differential accuracy of, and associated weight loss due to volatiles (Millstein et al.), 649
Slides, Diazochrome, as teaching aids, simple technique for making (Tanaka), 345
Sockets, human tooth, immediate implantation of acrylic resin teeth into (Ehrlich and Azaz), 205
Splint(s), complete denture, final impressions, and replica dentures: zipper technique for duplicating dentures (Singer), 582
improved Gunning (Goss and Brown), 562
Splint(s)—Cont'd
occlusal, influence of, on jaw position and musculature in patients with temporomandibular joint dysfunction (Kovaleski and De Boever), 321
pantographic records on TMJ dysfunction subjects treated with: progress report (Roura and Clayton), 442
processed provisional, in periodontal prostheses (Federick), 553
Staining, contouring and, ceramic-metal restorations in mouth (Richardson and Gardner), 637
Stents, dynamic orificial resin adjustable nasal (Doran), 315
Stone, dental, surface characteristics of: impression orientation (Young), 336
Storage of information, Part II. Development of simplified system for clinical evaluation of occlusal interrelationships (Rieder), 433
Stress and deflection of three different pontic designs (Hood et al.), 54
Support, partial, of overdentures, selectively retained vital roots for: patient report (Guyer), 258
Surface characteristics of dental stone: impression orientation (Young), 336
identification, denture, use of in vitro test method as applied to (Johns et al.), 454
Surgery, preprosthetic, role of prosthodontist in (Wilkie), 386
Swallowing of dental appliances, aspiration or, methods to preclude (Zakaria), 575
System, simplified, for clinical evaluation of occlusal interrelationships, development of. Part I. Acquisition of information (Rieder), 264
Part II. Storage of information (Rieder), 433
Systemic and prosthodontic treatment to prevent bone resorption in edentulous patients (Page), 483

T

Teaching aids, simple technique for making Diazochrome slides as (Tanaka), 345
core course in occlusion (Weisgold), 89
preclinical complete denture prosthodontics, analysis of experimental approach to (Lang), 521
Technique, complete denture, using natural anterior teeth (Kafandaris and Theodorou), 571
diagnostic wax-up (Morgan et al.), 169
impression, for cast restorations (Culbreath), 417
for making temporary bases for complete dentures (Assadzadeh and Yarmand), 333
modified hygroscopic gold casting (Cecconi and Asgar), 216
simple, for making Diazochrome slides as teaching aids (Tanaka), 345

Technique—Cont'd
zipper, for duplicating dentures: final impressions, replica dentures, and complete denture splint (Singer), 582
Teeth, acrylic resin, immediate implantation of, into human tooth sockets (Ehrlich and Azaz), 205
artificial, measuring rate of wear of, in complete dentures (Harrison and Huggett), 615
transition from natural to (Plainfield), 489
natural anterior, complete denture technique using (Kafandaris and Theodorou), 571
porcelain denture, silane bonding of, to acrylic resin denture bases (Moffa et al.), 620
resin, blocks of, occlusion rims with (Klein), 17
shifting of, method of reducing, in denture processing (Vig), 80
Temporary bases for complete dentures, technique for making (Assadzadeh and Yarmand), 333
Temporomandibular joint—diginglymus joint (Hilloowala), 328
disc of, function of (Gillbe), 196
dysfunction, influence of occlusal splints on jaw position and musculature in patients with (Kovaleski and De Boever), 321
function, radiographic investigations into (Weinberg), 672
Terminal hinge axis and apex of Gothic arch tracing, comparison of empirical centric relation records with location of (Smith), 511
Test method, in vitro, use of, as applied to denture surface identification (Johns et al.), 454
Through eyes of editor (Boucher), 1, 119, 239, 362, 479
(Hickey), 599
Thyrocalcitonin and growth hormones, effect of, on bone metabolism (Klein), 365
Tissue reactions to implants composed of gold alloy and dental amalgam (Nagem-Filho et al.), 542
TMJ dysfunction subjects, pantographic records on, treated with occlusal splints: progress report (Roura and Clayton), 442
Tooth mobility and chewing efficiency with various maxillary dentitions, Part III. Effects of variations in opposing dentition on changes in partially edentulous mandible (Plotnick et al.), 529
Tooth—Cont'd
sockets, human, immediate implantation of acrylic resin teeth into (Ehrlich and Azaz), 205
supported dentures, abutment designs for, load transfer to alveolar bone as influenced by (Warren and Caputo), 137
Tracing, Gothic arch, apex of, location of terminal hinge axis and, comparison of empirical centric relation records with (Smith), 511
Treatment modality—dialogue (Nassif et al.), 696
systemic and prosthodontic, to prevent bone resorption in edentulous patients (Page), 483

U

United Kingdom and Scandinavia, removable prosthodontics in (Levin), 224

V

Vital roots, selectively retained, for partial support of overdentures: patient report (Guyer), 258
Volatiles, associated weight loss due to, differential accuracy of silicone-body interocclusal records and (Millstein et al.), 649

W

Wafers, crisp and soggy, chewing of, comparison of masseter muscle activity during, in denture and dentition groups, Part I. Studies of biologic parameters for denture design (Kapur), 242
Wave modulated, nonfiltered full-, vs. filtered current: histologic and electronic evaluation of electrosurgical currents (Sozio et al.), 300
Wax method, direct, for fabrication of metallic facial molds (Zini et al.), 85
Wax-up technique, diagnostic (Morgan et al.), 169
Wear, measuring rate of, of artificial teeth in complete dentures (Harrison and Huggett), 615
Weight loss, associated, due to volatiles, differential accuracy of silicone-body interocclusal records and (Millstein et al.), 649

Z

Zipper technique for duplicating dentures: final impressions, replica dentures, and complete denture splint (Singer), 582

Subject index

A

Abutment(s), clasp-bearing, complete crown construction for (Welsh), 320
movement of, by removable partial denture frameworks with hemimaxillectomy obturator (Fiebiger et al.), 555
Acrylic resin bases, anterior, minor connector designs for: preliminary study (Dunny and King), 496
Adhesive technique for small anterior fixed partial dentures (Stolpa), 513
Alloy palates, chromium, phonetic considerations of, for complete dentures (Hansen), 620
Alveolar bone, modification of stresses in, induced by tilted molar (Hood et al.), 415
ridges, edentulous residual, microscopic anatomy of (Pudwill and Wentz), 448
Amalgam restorations, study of temperature changes during removal of (Wittrock et al.), 179
American Academy of Restorative Dentistry, report of Committee on Scientific Investigation of (Hamilton et al.), 86
Board of Prosthodontics (Laney), 675
College of Prosthodontists, The, survey of income of prosthodontists as assessed by (Kelsey), 120
Anatomy, microscopic, of edentulous residual alveolar ridges (Pudwill and Wentz), 448
Anomaly of mylohyoid muscle, variation in complete mandibular impression form related to (Simmonds and Jones), 384
Arch bars, cast, used in orthognathic surgery (Scott and Frew), 698
Areas, retentive, preparation of, for clasps in enamel (Axinn), 405
Articulators, accurate location and relocation of casts on (Schwarz and Gear), 694
Dentatus AR series of, adjustment of lateral condylar guidances of (Smith), 208

B

Bars, cast arch, used in orthognathic surgery (Scott and Frew), 698
Bases, anterior acrylic resin, minor connector designs for: preliminary study (Dunny and King), 496
Board of Prosthodontics, American (Laney), 675
Bone, alveolar, modification of stresses in, induced by tilted molar (Hood et al.), 415
Bony residual ridge in man (Pietrokovski), 456
Book review(s), 111, 230, 354, 593
Boucher, Carl O., 1904—1975 (Steffel), 368
D.D.S. (Oct. 14, 1904—March 11, 1975): in memoriam (DeVan), 366
maintaining high standards set by—editorial operation (Hickey), 371
Brushing frequency, tooth, artificial crown margin extension and, effects of, on gingival pocket depth (Larato), 640

C

Canine, eminent (Spanko), 48
Cast(s), accurate location and relocation of, on articulators (Schwarz and Gear), 694
arch bars used in orthognathic surgery (Scott and Frew), 698

July, pp. 1-116; August, pp. 117-240; September, pp. 241-360; October, pp. 361-482; November, pp. 483-598; December, pp. 599-720.

Cast(s)—Cont'd
optical surveying of, for removable partial dentures (Yilmaz), 292
restoration—why is it high? (Douglass), 491
Casting investments, dental, permeability and porosity of (Ballard et al.), 170
Centric relation position, diurnal variance of (Shafagh et al.), 574
Ceramic-metal restorations, soldering (Presswood), 352
Characteristics, properties and, of resin die material (Moser et al.), 297
Chest pain, chronic myofascial pain-dysfunction syndrome with (Rosenthal), 444
Chewing, motionless period in, electromyographic activity during the (Gibbs), 35
Chromium alloy palates, phonetic considerations of, for complete dentures (Hansen), 620
Clasp(s)-bearing abutment, complete crown construction for (Welsh), 320
in enamel, preparation of retentive areas for (Axinn), 405
reciprocation and retention, guiding planes in (Stern), 408
repair, immediate, method of (Teppo and Smith), 77
Cleft-palate patients, fixed-removable partial denture for (Immekus and Aramany), 286
Clinical investigation: root rest and removable partial denture (Waller), 16
procedures for improving veneered metal crowns (Pietrokovski and Sorin), 503
Clips, needles, pins, or matches (Balshi and Mingledorff), 467
Committee on Scientific Investigation of American Academy of Restorative Dentistry, report of (Hamilton et al.), 86
Communication, nonverbal, in dentist-patient relationship (Baseheart), 4
Complete crown construction for clasp-bearing abutment (Welsh), 320
denture(s), importance of Hanau formula in construction of (Javid and Porter), 397
improving retention of (Winkler et al.), 11
phonetic considerations of chromium alloy palates for (Hansen), 620
postinsertion changes in (Michman and Langer), 125
prosthodontics, effect of tissue resiliency on occlusion in (Heartwell), 602
—state of art (Boucher), 372
Complete—Cont'd
mandibular impression form, variation in, related to anomaly of mylohyoid muscle (Simmonds and Jones), 384
Composite resin restorations, marginal penetration of, as indicated by tracer dye (Rafei and Moore), 435
Compressive facial splints (Parel and Metalon), 440
Conditioning dentures for problem patients (Harris and Mack), 141
Condylar displacement, anterior: its diagnosis and treatment (Weinberg), 195
superior: its diagnosis and treatment (Weinberg), 59
guidances, lateral, of Dentatus AR series of articulators, adjustment of (Smith), 208
Connector designs, minor, for anterior acrylic resin bases: preliminary study (Dunny and King), 496
Contamination, cross-, reducing, in prosthodontics (Grant and Walsh), 324
Core(s), posts and, direct technique for fabrication of (Shadman and Azarmehr), 463
secondary intention dowel and (Federick and Serene), 41
Courses, postgraduate and refresher, 233, 473
Cranial implant problems (Sabin), 659
Cross-contamination, reducing, in prosthodontics (Grant and Walsh), 324
Crown(s) construction, complete, for clasp-bearing abutment (Welsh), 320
margin extension, artificial, and tooth brushing frequency, effects of, on gingival pocket depth (Larato), 640
and pontics, anterior, for anterior fixed partial dentures, esthetic guides for arranging (Askinas), 53
technique, precision porcelain jacket (Riley et al.), 346
veneered metal, clinical procedures for improving (Pietrokovski and Sorin), 503
Cutting technique, low-torque, ultrahigh-speed, histologic assessment of (Schuchard), 644
Cyanoacrylate, ethyl, retentive properties of stainless steel pins cemented with (Lambert), 187

D

Dedication, life of, 365
Dentatus AR series of articulators, adjustment of lateral condylar guidances of (Smith), 208

Dentist(s)-patient relationship, nonverbal communication in (Baseheart), 4
variations in removable maxillary partial denture design by (Frantz), 625
Denture(s), anterior fixed partial, esthetic guides for arranging anterior crowns and pontics for (Askinas), 53
complete, importance of Hanau formula in construction of (Javid and Porter), 397
improving retention of (Winkler et al.), 11
phonetic considerations of chromium alloy palates for (Hansen), 620
postinsertion changes in (Michman and Langer), 125
conditioning, for problem patients (Harris and Mack), 141
design, removable maxillary partial, variations in, by dentists (Frantz), 625
fixed-removable partial, for cleft-palate patients (Immekus and Aramany), 286
frameworks, removable partial, with hemimaxillectomy obturator, movement of abutments by (Fiebiger et al.), 555
liners, nystatin-containing, physical and mechanical properties of (Douglas and Clarke), 428
overlay, use of natural teeth in (Frantz), 135
porcelain occlusal posterior fixed partial (Chandler et al.), 583
processing, immediate, with fluid resin (Oliver et al.), 216
prosthodontics, complete, effect of tissue resiliency on occlusion in (Heartwell), 602
—state of art (Boucher), 372
provisional fixed partial (Federick), 520
remake, denture tray technique for (Wilson and Anderson), 81
removable partial, modified flasking technique for (Bolouri et al.), 221
optical surveying of casts for (Yilmaz), 292
preparing guide planes for (Krikos), 152
root rest and: clinical investigation (Waller), 16
stressbreakers and (Cecconi et al.), 145
small anterior fixed partial, adhesive technique for (Stolpa), 513
tray technique for remake dentures (Wilson and Anderson), 81
upper, relining, use of remount jig as aid in (Shannon), 393
Design(s), minor connector, for anterior acrylic resin bases: preliminary study (Dunny and King), 496
Design(s)—Cont'd
removable maxillary partial denture, variations in, by dentists (Frantz), 625
Devices, mouth-operated, for handicapped persons (Zalkind et al.), 652
Diagnosis and treatment: anterior condylar displacement (Weinberg), 195
superior condylar displacement (Weinberg), 59
Die material, resin, properties and characteristics of (Moser et al.), 297
Dimension measurements, vertical (Sheppard and Sheppard), 269
Directory, 113, 237, 356, 477, 594, 701
Displacement, anterior condylar: its diagnosis and treatment (Weinberg), 195
superior condylar: its diagnosis and treatment (Weinberg), 59
Diurnal variance of centric relation position (Shafagh et al.), 574
Dowel and core, secondary intention (Federick and Serene), 41
Drills, Kodex, new paralleling instrument, Paramax II, and (Göransson and Parmlid), 31
Dye, tracer, marginal penetration of composite resin restorations as indicated by (Rafei and Moore), 435
Dysfunction-pain syndrome, chronic myofascial, with chest pain (Rosenthal), 444

E

Eagle's syndrome, prosthetic implications of (Phillips and Shawkat), 614
Edentulous patient, mouth protector for (Barankovich), 588
residual alveolar ridges, microscopic anatomy of (Pudwill and Wentz), 448
Editor, through eyes of (Hickey), 1, 117, 241
(Section editors), 361, 483, 599
Editorial operation—maintaining high standards set by Dr. Carl O. Boucher (Hickey), 371
Elastic impression materials, comparison of (Stackhouse), 305
Electromyographic activity during motionless period in chewing (Gibbs), 35
Emotional aspects of new prostheses for previously treated maxillofacial patients (Davidson et al.), 55
Enamel, clasps in, preparation of retentive areas for (Axinn), 405
Esthetic guide(s) for arranging anterior crowns and pontics for anterior fixed partial dentures (Askinas), 53
in prosthodontics, value of nose width as (Smith), 562

Ethyl cyanoacrylate, retentive properties of stainless steel pins cemented with (Lambert), 187
Etiology of inflammatory papillary hyperplasia (Ettinger), 254
Extension, silicone-lined hollow, maxillary obturator with (Ohyama et al.), 336
Extraction of teeth and prosthetic treatment, changes in shape of posterior parts of upper jaws after (Berg et al.), 262

F

Face height, occlusal, changes in, with removable partial prostheses (Smith), 278
Facial prosthesis, large, retaining (Tautin and Schoemann), 342
splints, compressive (Parel and Matalon), 440
Factors, critical, in selecting removable prostheses (Miller), 486
Fixed partial denture(s), anterior, esthetic guides for arranging anterior crowns and pontics for (Askinas), 53
porcelain occlusal posterior (Chandler et al.), 583
provisional (Federick), 520
small anterior, adhesive technique for (Stolpa), 513
prosthodontics, paradoxes of (Antonoff), 164
study of porcelain surfaces as utilized in (Barghi et al.), 314
removable partial denture for cleft-palate patients (Immekus and Aramany), 286
Flasking technique, modified, for removable partial dentures (Bolouri et al.), 221
Floor resection, orbital, maxillectomy and, prosthetic support of visual apparatus following (Parel and Drane), 329
Fluid resin, immediate denture processing with (Oliver et al.), 216
Form(s), complete mandibular impression, variation in, related to anomaly of mylohyoid muscle (Simmonds and Jones), 384
varying palatal, study of posterior palatal seals with (Nikoukari), 605
Formula, Hanau, importance of, in construction of complete dentures (Javid and Porter), 397
Fractures, subgingival and subosseous, restoration of teeth with (Goerig), 634
Frameworks, removable partial denture, with hemimaxillectomy obturator, movement of abutments by (Fiebiger et al.), 555

G

Gingival pocket depth, effects of artificial crown margin extension and tooth brushing frequency on (Larato), 640
Guidances, lateral condylar, of Dentatus AR series of articulators, adjustment of (Smith), 208
Guide(s), esthetic, for arranging anterior crowns and pontics for anterior fixed partial dentures (Askinas), 53
planes, preparing, for removable partial dentures (Krikos), 152
Guiding planes in clasp reciprocation and retention (Stern), 408

H

Hanau formula, importance of, in construction of complete dentures (Javid and Porter), 397
Handicapped persons, mouth-operated devices for (Zalkind et al.), 652
Height, occlusal face, changes in, with removable partial prostheses (Smith), 278
Hemimaxillectomy obturator, removable partial denture frameworks with, movement of abutments by (Fiebiger et al.), 555
High-speed, ultra-, low-torque cutting technique, histologic assessment of (Schuchard), 644
Histologic assessment of low-torque, ultrahigh-speed cutting technique (Schuchard), 644
Hollow extension, silicone-lined, maxillary obturator with (Ohyama et al.), 336
Hyperplasia, inflammatory papillary, etiology of (Ettinger), 254

I

Implant problems, cranial (Sabin), 659
Impression form, complete mandibular, variation in, related to anomaly of mylohyoid muscle (Simmonds and Jones), 384
materials, elastic, comparison of (Stackhouse), 305
Income of prosthodontists, survey of, as assessed by The American College of Prosthodontists (Kelsey), 120
Indirect retainer, efficiency of (Fisher and Jaslow), 24
Inflammatory papillary hyperplasia, etiology of (Ettinger), 254

Instrument, new paralleling, Paramax II, and Kodex drills (Göransson and Parmlid), 31
Intraoral radiotherapy prostheses, fabrication of (Santiago), 212
Investments, dental casting, permeability and porosity of (Ballard et al.), 170
Iris sizes, coordination of, in ocular prostheses (Firtell), 334

J

Jacket crown technique, precision porcelain (Riley et al.), 346
Jaws, upper, changes in shape of posterior parts of, after extraction of teeth and prosthetic treatment (Berg et al.), 262
Jig, remount, use of, as aid in relining upper dentures (Shannon), 393
Joints, preceramic and postceramic solder (Stade et al.), 527
JOURNAL OF PROSTHETIC DENTISTRY, THE, birth of, 369

K

Kodex drills, new paralleling instrument, Paramax II, and (Göransson and Parmlid), 31

L

Lateral condylar guidances of Dentatus AR series of articulators, adjustment of (Smith), 208
Liners, nystatin-containing denture, physical and mechanical properties of (Douglas and Clarke), 428
Location and relocation, accurate, of casts on articulators (Schwarz and Gear), 694
Low-torque, ultrahigh-speed cutting technique, histologic assessment of (Schuchard), 644

M

Mandibular impression form, complete, variation in, related to anomaly of mylohyoid muscle (Simmonds and Jones), 384
Margin extension, artificial crown, and tooth brushing frequency, effects of, on gingival pocket depth (Larato), 640
Marginal penetration of composite resin restorations as indicated by tracer dye (Rafei and Moore), 435
Matches, clips, needles, or pins (Balshi and Mingledorff), 467
Material(s), elastic impression, comparison of (Stackhouse), 305
resin die, properties and characteristics of (Moser et al.), 297
Maxillary obturator with silicone-lined hollow extension (Ohyama et al.), 336
partial denture design, removable, variations in, by dentists (Frantz), 625
Maxillectomy and orbital floor resection, prosthetic support of visual apparatus following (Parel and Drane), 329
Maxillofacial patient(s), physical problems in obtaining records of (Curtis et al.), 539
previously treated, emotional aspects of new prostheses for (Davidson et al.), 55
prosthetics, psychological considerations in (Bailey and Edwards), 533
Measurements, vertical dimension (Sheppard and Sheppard), 269
Mechanical properties, physical and, of nystatin-containing denture liners (Douglas and Clarke), 428
Memoriam, in: Carl O. Boucher, D.D.S. (Oct. 14, 1904—March 11, 1975) (DeVan), 366
Metal, ceramic-, restorations, soldering (Presswood), 352
crowns, veneered, clinical procedures for improving (Pietrokovski and Sorin), 503
Method of immediate clasp repair (Teppo and Smith), 77
Microscopic anatomy of edentulous residual alveolar ridges (Pudwill and Wentz), 448
Minor connector designs for anterior acrylic resin bases: preliminary study (Dunny and King), 496
Molar, tilted, modification of stresses in alveolar bone induced by (Hood et al.), 415
Motionless period in chewing, electromyographic activity during (Gibbs), 35
Mouth-operated devices for handicapped persons (Zalkind et al.), 652
protector for edentulous patient (Barankovich), 588
Movement of abutments by removable partial denture frameworks with hemimaxillectomy obturator (Fiebiger et al.), 555
Mucosa and skin, rodent oral, differences in response of, to repeated surface trauma (Mackenzie and Ettinger), 666
Muscle, mylohyoid, anomaly of, variation in complete mandibular impression form related to (Simmonds and Jones), 384

Mylohyoid muscle, anomaly of, variation in complete mandibular impression form related to (Simmonds and Jones), 384
Myofascial pain-dysfunction syndrome, chronic, with chest pain (Rosenthal), 444
Myo-Monitor stimulus, neural conduction of: quantitative analysis (Jankelson et al.), 245

N

Natural teeth, use of, in overlay dentures (Frantz), 135
Needles, pins, matches, or clips (Balshi and Mingledorff), 467
Neural conduction of Myo-Monitor stimulus: quantitative analysis (Jankelson et al.), 245
News and notes, 115, 239, 358, 479, 596, 718
Nonverbal communication in dentist-patient relationship (Baseheart), 4
Nose width, value of, as esthetic guide in prosthodontics (Smith), 562
Nystatin-containing denture liners, physical and mechanical properties of (Douglas and Clarke), 428

O

Obturator, hemimaxillectomy, removable partial denture frameworks with, movement of abutments by (Fiebiger et al.), 555
  maxillary, with silicone-lined hollow extension (Ohyama et al.), 336
Occlusal face height, changes in, with removable partial prostheses (Smith), 278
  posterior fixed partial dentures, porcelain (Chandler et al.), 583
  treatment, simple test to determine need for (Rosenthal and Burch), 508
Occlusion in complete denture prosthodontics, effect of tissue resiliency on (Heartwell), 602
Ocular prostheses, coordination of iris sizes in (Firtell), 334
    vein application technique for (Firtell et al.), 192
Operative dentistry, periodontal considerations in (Burch), 156
Optical surveying of casts for removable partial dentures (Yilmaz), 292
Oral mucosa and skin, rodent, response of, to repeated surface trauma, differences in (Mackenzie and Ettinger), 666
Orbital floor resection, maxillectomy and, prosthetic support of visual apparatus following (Parel and Drane), 329
Orthognathic surgery, cast arch bars used in (Scott and Frew), 698
Overlay dentures, use of natural teeth in (Frantz), 135

P

Pain, chest, chronic myofascial pain-dysfunction syndrome with (Rosenthal), 444
  dysfunction syndrome, chronic myofascial, with chest pain (Rosenthal), 444
Palatal plate, immediate (Langer), 422
  seals, posterior, with varying palatal forms, study of (Nikoukari), 605
Palate(s), chromium alloy, phonetic considerations of, for complete dentures (Hansen), 620
  cleft-, patients, fixed-removable partial denture for (Immekus and Aramany), 286
Papillary hyperplasia, inflammatory, etiology of (Ettinger), 254
Paralleling instrument, new, Paramax II, and Kodex drills (Göransson and Parmlid), 31
Paramax II, new paralleling instrument, and Kodex drills (Göransson and Parmlid), 31
Partial denture(s), anterior fixed, esthetic guides for arranging anterior crowns and pontics for (Askinas), 53
    design, removable maxillary, variations in, by dentists (Frantz), 625
    fixed-removable, for cleft-palate patients (Immekus and Aramany), 286
    frameworks, removable, with hemimaxillectomy obturator, movement of abutments by (Fiebiger et al.), 555
    porcelain occlusal posterior fixed (Chandler et al.), 583
    provisional fixed (Federick), 520
    removable, modified flasking technique for (Bolouri et al.), 221
      optical surveying of casts for (Yilmaz), 292
      preparing guide planes for (Krikos), 152
      root rest and: clinical investigation (Waller), 16
      stressbreakers and (Cecconi et al.), 145
    small anterior fixed, adhesive technique for (Stolpa), 513
  prostheses, removable, changes in occlusal face height with (Smith), 278
Patient(s), cleft-palate, fixed-removable partial denture for (Immekus and Aramany), 286
  dentist relationship, nonverbal communication in (Baseheart), 4
  edentulous, mouth protector for (Barankovich), 588

Patient(s)—Cont'd
maxillofacial, physical problems in obtaining records of (Curtis et al.), 539
previously treated maxillofacial, emotional aspects of new prostheses for (Davidson et al.), 55
problem, conditioning dentures for (Harris and Mack), 141
Penetration, marginal, of composite resin restorations as indicated by tracer dye (Rafei and Moore), 435
Periodontal considerations in operative dentistry (Burch), 156
Permeability and porosity of dental casting investments (Ballard et al.), 170
Phonetic considerations of chromium alloy palates for complete dentures (Hansen), 620
Physical and mechanical properties of nystatin-containing denture liners (Douglas and Clarke), 428
problems in obtaining records of maxillofacial patient (Curtis et al.), 539
Pins, matches, clips, or needles (Balshi and Mingledorff), 467
stainless steel, retentive properties of, cemented with ethyl cyanoacrylate (Lambert), 187
Planes, guide, preparing, for removable partial dentures (Krikos), 152
guiding, in clasp reciprocation and retention (Stern), 408
Plate, immediate palatal (Langer), 422
Pocket depth, gingival, effects of artificial crown margin extension and tooth brushing frequency on (Larato), 640
Pontics, crowns and, anterior, for anterior fixed partial dentures, esthetic guides for arranging (Askinas), 53
Porcelain jacket crown technique, precision (Riley et al.), 346
occlusal posterior fixed partial dentures (Chandler et al.), 583
surfaces, study of, as utilized in fixed prosthodontics (Barghi et al.), 314
Porosity, permeability and, of dental casting investments (Ballard et al.), 170
Position, centric relation, diurnal variance of (Shafagh et al.), 574
Postceramic solder joints, preceramic and (Stade et al.), 527
Posterior fixed partial dentures, porcelain occlusal (Chandler et al.), 583
parts of upper jaws, changes in shape of, after extraction of teeth and prosthetic treatment (Berg et al.), 262
Postgraduate and refresher courses, 233, 473
Postinsertion changes in complete dentures (Michman and Langer), 125
Posts and cores, direct technique for fabrication of (Shadman and Azarmehr), 463
Preceramic and postceramic solder joints (Stade et al.), 527
Problem patients, conditioning dentures for (Harris and Mack), 141
Processing, immediate denture, with fluid resin (Oliver et al.), 216
Properties and characteristics of resin die material (Moser et al.), 297
physical and mechanical, of nystatin-containing denture liners (Douglas and Clarke), 428
retentive, of stainless steel pins cemented with ethyl cyanoacrylate (Lambert), 187
Prostheses, intraoral radiotherapy, fabrication of (Santiago), 212
new, emotional aspects of, for previously treated maxillofacial patients (Davidson et al.), 55
ocular, coordination of iris sizes in (Firtell), 334
vein application technique for (Firtell et al.), 192
removable, critical factors in selecting (Miller), 486
partial, changes in occlusal face height with (Smith), 278
Prosthesis, large facial, retaining (Tautin and Schoemann), 342
Prosthodontics, American Board of (Laney), 675
complete denture, effect of tissue resiliency on occlusion in (Heartwell), 602
—state of art (Boucher), 372
fixed, paradoxes of (Antonoff), 164
study of porcelain surfaces as utilized in (Barghi et al.), 314
reducing cross-contamination in (Grant and Walsh), 324
value of nose width as esthetic guide in (Smith), 562
Prosthodontists, survey of income of, as assessed by The American College of Prosthodontists (Kelsey), 120
Protector, mouth, for edentulous patient (Barankovich), 588
Psychological considerations in maxillofacial prosthetics (Bailey and Edwards), 533

R

Radiotherapy prostheses, intraoral, fabrication of (Santiago), 212

Readers' round table, 224, 591
Records of the maxillofacial patient, physical problems in obtaining (Curtis et al.), 539
Relation position, centric, diurnal variance of (Shafagh et al.), 574
Relationship, dentist-patient, nonverbal communication in (Baseheart), 4
Relining upper dentures, use of remount jig as aid in (Shannon), 393
Remake dentures, denture tray technique for (Wilson and Anderson), 81
Remount jig, use of, as aid in relining upper dentures (Shannon), 393
Removable-fixed partial denture for cleft-palate patients (Immekus and Aramany), 286
  maxillary partial denture design, variations in, by dentists (Frantz), 625
  partial denture(s) frameworks with hemimaxillectomy obturator, movement of abutments by (Fiebiger et al.), 555
    modified flasking technique for (Bolouri et al.), 221
    optical surveying of casts for (Yilmaz), 292
    preparing guide planes for (Krikos), 152
    root rest and: clinical investigation (Waller), 16
    stressbreakers and (Cecconi et al.), 145
  prostheses, changes in occlusal face height with (Smith), 278
  prostheses, critical factors in selecting (Miller), 486
Repair, immediate clasp, method of (Teppo and Smith), 77
Report of Committee on Scientific Investigation of American Academy of Restorative Dentistry (Hamilton et al.), 86
Resection, orbital floor, maxillectomy and, prosthetic support of visual apparatus following (Parel and Drane), 329
Resin bases, anterior acrylic, minor connector designs for: preliminary study (Dunny and King), 496
  die material, properties and characteristics of (Moser et al.), 297
  fluid, immediate denture processing with (Oliver et al.), 216
  restorations, composite, marginal penetration of, as indicated by tracer dye (Rafei and Moore), 435
Response of rodent oral mucosa and skin to repeated surface trauma, differences in (Mackenzie and Ettinger), 666
Rest, root, and removable partial denture: clinical investigation (Waller), 16
Restoration(s), amalgam, study of temperature changes during removal of (Wittrock et al.), 179
  cast—why is it high? (Douglass), 491
  ceramic-metal, soldering (Presswood), 352
  composite resin, marginal penetration of, as indicated by tracer dye (Rafei and Moore), 435
  of teeth with subgingival and subosseous fractures (Goerig), 634
Retainer, indirect, efficiency of (Fisher and Jaslow), 24
Retention, clasp reciprocation and, guiding planes in (Stern), 408
  of complete dentures, improving (Winkler et al.), 11
Retentive areas, preparation of, for clasps in enamel (Axinn), 405
  properties of stainless steel pins cemented with ethyl cyanoacrylate (Lambert), 187
Review(s), book, 111, 230, 354, 593
Ridge(s), bony residual, in man (Pietrokovski), 456
  edentulous residual alveolar, microscopic anatomy of (Pudwill and Wentz), 448
Rodent oral mucosa and skin, response of, to repeated surface trauma, differences in (Mackenzie and Ettinger), 666
Root rest and removable partial denture: clinical investigation (Waller), 16

S

Scientific Investigation, Committee on, of American Academy of Restorative Dentistry, report of (Hamilton et al.), 86
Seals, posterior palatal, with varying palatal forms, study of (Nikoukari), 605
Secondary intention dowel and core (Federick and Serene), 41
Shape of posterior parts of upper jaws, changes in, after extraction of teeth and prosthetic treatment (Berg et al.), 262
Silicone-lined hollow extension, maxillary obturator with (Ohyama et al.), 336
Sizes, iris, coordination of, in ocular prostheses (Firtell), 334
Skin and oral mucosa, rodent, differences in response of, to repeated surface trauma (Mackenzie and Ettinger), 666
Solder joints, preceramic and postceramic (Stade et al.), 527

Soldering ceramic-metal restorations (Presswood), 352
Speed, ultrahigh-, low-torque cutting technique, histologic assessment of (Schuchard), 644
Splints, compressive facial (Parel and Matalon), 440
Stainless steel pins, retentive properties of, cemented with ethyl cyanoacrylate (Lambert), 187
Standards, high, maintaining, set by Dr. Carl O. Boucher—editorial operation (Hickey), 371
Steel pins, stainless, retentive properties of, cemented with ethyl cyanoacrylate (Lambert), 187
Stimulus, Myo-Monitor, neural conduction of: quantitative analysis (Jankelson et al.), 245
Stressbreakers and removable partial denture (Cecconi et al.), 145
Stresses, modification of, in alveolar bone induced by tilted molar (Hood et al.), 415
Subgingival and subosseous fractures, restoration of teeth with (Goerig), 634
Subosseous fractures, subgingival and, restoration of teeth with (Goerig), 634
Support, prosthetic, of visual apparatus following maxillectomy and orbital floor resection (Parel and Drane), 329
Surfaces, porcelain, study of, as utilized in fixed prosthodontics (Barghi et al.), 314
Surgery, orthognathic, cast arch bars used in (Scott and Frew), 698
Survey of income of prosthodontists as assessed by The American College of Prosthodontists (Kelsey), 120
Surveying, optical, of casts for removable partial dentures (Yilmaz), 292
Syndrome, chronic myofascial pain-dysfunction, with chest pain (Rosenthal), 444
  Eagle's, prosthetic implications of (Phillips and Shawkat), 614

T

Technique, adhesive, for small anterior fixed partial dentures (Stolpa), 513
  denture tray, for remake dentures (Wilson and Anderson), 81
  direct, for fabrication of posts and cores (Shadman and Azarmehr), 463
  low-torque, ultrahigh-speed cutting, histologic assessment of (Schuchard), 644
  modified flasking, for removable partial dentures (Bolouri et al.), 221
Technique—Cont'd
  precision porcelain jacket crown (Riley et al.), 346
  vein application, for ocular prostheses (Firtell et al.), 192
Teeth, extraction of, and prosthetic treatment, changes in shape of posterior parts of upper jaws after (Berg et al.), 262
  natural, use of, in overlay dentures (Frantz), 135
  with subgingival and subosseous fractures, restoration of (Goerig), 634
Temperature changes, study of, during removal of amalgam restorations (Wittrock et al.), 179
Test, simple, to determine need for occlusal treatment (Rosenthal and Burch), 508
Tissue resiliency, effect of, on occlusion in complete denture prosthodontics (Heartwell), 602
Tooth brushing frequency, artificial crown margin extension and, effects of, on gingival pocket depth (Larato), 640
Torque, low-, ultrahigh-speed cutting technique, histologic assessment of (Schuchard), 644
Tracer dye, marginal penetration of composite resin restorations as indicated by (Rafei and Moore), 435
Trauma, repeated surface, differences in response of rodent oral mucosa and skin to (Mackenzie and Ettinger), 666
Tray technique, denture, for remake dentures (Wilson and Anderson), 81
Treatment, diagnosis and: anterior condylar displacement (Weinberg), 195
  superior condylar displacement (Weinberg), 59
  individualized prosthetic, planning for (Kabcenell), 389
  occlusal, simple test to determine need for (Rosenthal and Burch), 508
  prosthetic, extraction of teeth and, changes in shape of posterior parts of upper jaws after (Berg et al.), 262

U

Ultrahigh-speed, low-torque cutting technique, histologic assessment of (Schuchard), 644
Upper dentures, relining, use of remount jig as aid in (Shannon), 393

V

Vein application technique for ocular prostheses (Firtell et al.), 192

Veneered metal crowns, clinical procedures for improving (Pietrokovski and Sorin), 503
Vertical dimension measurements (Sheppard and Sheppard), 269
Visual apparatus, prosthetic support of, following maxillectomy and orbital floor resection (Parel and Drane), 329

W

Width, nose, value of, as esthetic guide in prosthodontics (Smith), 562
